

Department of Applied Mathematics and System Analysis

Research Internships

Duration: 1 month

Supervisor: Professor Aleksander Zemlyanukhin

e-mail: azemlyanukhin@mail.ru

Audience: graduate students, undergraduates

Language of training: English

The Department of Applied Mathematics and System Analysis is ready to provide a program of scientific internships for graduate students from foreign universities in the following areas:

1. Asymptotic methods in the problems of nonlinear wave dynamics of deformable systems.
2. Methods for constructing exact solutions of nonlinear differential and differential - difference equations.

The department has a laboratory base for research.
